                    Installation instructions for GTeX on PC      2004/11/29
                    ==========================================
```

   Please check _first_ the same file name in the "LaTeX2e sources" folder
and _read_ the given instructions, if they exist.

Special feature: runs under NT too.
===============

Distribution to install: FrenchPourWin.zip
=======================
is ready to run with winGUT, a former GUTenberg distribution for PC Windows.

Status
======
  GTeX is known to run correctly with FrenchPro.

General instructions
====================

  The installer will provide you the ready files. Few complementary
advices to be given...

  Read Bernard's documentation "ALIRE[.dvi,.ps]" and just do the formats
you need.

  Copy the "bin" files where you want.
  Copy the "formats" files where the old ones are.
  Copy all other _french_ files to the approriate \texmf location(s).

  Please, let know a more complete installation procedure, send a full
installation report to Bernard.
